CAUTION: This fertilizer contains zinc and should be used only as recommended. It may prove harmful when misused.

PRODUCT INFORMATION: Marco ammoniated complexes are designed to mix with ammonium polyphosphate (APP) solutions and are compatible with UAN and ammonium thiosulfate. When applied with a liquid starter in a concentrated band underneath the soil surface at planting, Marco Micro Z-15 ammoniated zinc can be ten times more effective than dry broadcast zinc. Application of zinc with phosphate fertilizer optimizes uptake of P and Zn in plants which enhances fertilizer efficiency and plant utilization when applied at correct rates.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual. Do not apply directly on the seed.

Soil Application: Apply in-furrow, 2x2 or at sidedress or topdress. Do not apply directly on the seed in saline, alkali, or coarse textured soils.

RECOMMENDED RATES: This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.
